SUMMARY

Highly skilled Software Engineer with over 2 years of experience specializing in Python and Django. Expertise in designing and developing secure web applications, implementing RESTful APIs, and optimizing database performance. Proficient in leveraging Agile methodologies and modern development tools to drive impactful projects and deliver exceptional results.

EXPERIENCE

Software Engineer

Capgemini

July 2022 - Present, Gandhinagar, India

- Designed and developed a secure, robust, and reliable web application for software configuration and data acquisition from IoT based medical devices using Python and REST API structures.
- Created detailed design documents with diverse diagrams such as flowcharts, sequence diagrams, and class diagrams, to visually represent the architecture and workflows of application.
- Implemented RESTful APIs using Django Rest Framework to facilitate real-time messaging and seamless frontend-backend communication, improving application performance and reducing the response time by 25%.
- Collected the data from completed medical device runs and stored into a MySQL database, ensuring efficient data storage and retrieval while optimizing query performance by 20%.
- Built interactive and responsive user interfaces using ReactJS, enhancing user experience through efficient rendering and intuitive design.
- Devised comprehensive unit tests using PyTest, Python scripts, and tools, achieving 95% code coverage and minimizing production defects.
- Utilized Docker and Azure Cloud Services for hosting and managing containerized environments, streamlining the development and deployment workflows.
- Leveraged Git, Jira, and Agile methodologies in SAFe-driven projects, promoting effective team coordination and achieving a 95% on-time delivery rate for project milestones.

Python Intern

Axisray

January 2022 - April 2022, Ahmedabad, India

- Formulated a Python based automation scripts for setting up cross-platform environments using OpenCV and PyTorch, resulting in a 3X boost in training efficiency.
- Implemented a multi-class object detector using the YOLOv5 deep learning model, achieving a 90% accuracy rate by employing a targeted divide-and-conquer strategy.
- Gained strong Python skills alongside expertise in libraries such as NumPy, Pandas, OpenCV, and PyTorch, delving into Machine Learning, Computer Vision, and Deep Learning principles.
- Led key projects including Illegal Parking Detection, Mask Detection, and Object Detection (OD), emphasizing practical applications in real-world scenarios.

SKILLS

Programming Languages: Python, Java, Javascript, C/C++, SQL, HTML/CSS

Frameworks & Libraries: Django, Flask, Pandas, NumPy, OpenCV, PyTorch, Matplotlib, React.js, PyTest, Spring Boot, Hibernate

Databases & Cloud Services: MySQL, SQLite, MongoDB, Redis, Microsoft Azure

Development Tools: Git, Docker, VS Code, PyCharm, Jupyter Notebook, Eclipse, JIRA, HP-ALM

Core Concepts: Data Structures (Arrays, Linked Lists, Trees, Graphs), Algorithms (Sorting, Searching, Dynamic Programming), Object-Oriented Programming Principles, DBMS

Interest Areas: Machine Learning, Deep Learning, Computer Vision, Data Analytics & Visualization, Mathematics & Statistics

Interpersonal Skills: Team Collaboration, Stakeholder Engagement, Problem Solving, Presentation Skills

EDUCATION

Bachelor of Engineering in Information Technology

Lalbhai Dalpatbhai College of Engineering • CGPA: 8.9/10

August 2018 - June 2022, Ahmedabad, India

PROJECTS

Illegal Parking Detection System

- Created a computer vision system to automate the illegal parking detection, cutting down manual monitoring efforts by 70% and improving safety in urban areas.
- Built a YOLOv5-based object detector model, and trained on the COCO dataset, to achieve over 90% accuracy in vehicle recognition within video streams.
- Leveraged Python, OpenCV, and advanced machine learning techniques to automate the detection process, reducing development time and ensuring a reliable solution.

PEPTC Services

- Designed an intuitive web application with the Django framework, facilitating the booking of diverse home services such as Plumbing, Electrical work, Painting, Tailoring, and Carpentry.
- Adopted an MTV (Model-View-Template) architecture with SQLite for data management, resulting in a 25% improvement in data handling and access efficiency.
- Integrated JavaScript to improve user interactivity by 50%, allowing easy navigation through service categories, viewing available professionals, and scheduling appointments.
